gonzalo-porta-b53343184

Portfolio
gportabopp.github.io

Skills

Languages
Python, TypeScript / JavaScript, SQL

Automation
Pytest, Playwright, Appium (iOS / Android), WebdriverIO, BrowserStack, Postman

Performance
k6, Locust, JMeter

CI/CD
Azure DevOps, GitLab CI, GitHub Actions, Jenkins, Docker

Cloud & data
GCP (BigQuery, Pub/Sub, GCS), AWS, Oracle, SQLAlchemy

Other
Allure, Git, Linux / macOS, AI Agents

Education

Udemy
2023
Selenium WebDriver with Python · SQL & DevOps with GitLab CI/CD · Playwright Automation Testing

Instituto Tecnológico IT
2021–2022
QA / QC Testing · Python & Pytest · Selenium · REST APIs (Postman, JMeter)

UTN
2021–2022
Programming Fundamentals · SQL & NoSQL Databases

About Me

QA Engineer focused on web, mobile and backend automation and on designing reusable test solution architecture. Experience leading QA teams and processes. Proactive, responsible and a strong team player.

Experience

Nación Servicios · 2025 – Present

QA Technical Lead · Digital wallet (identity & biometrics)

- Manual and automated testing of Onboarding, Authenticator and identity verification (Face + ID, liveness, KYC).
- Biometric edge cases: spoofing attempts, low-quality images and expired documents.
- Web (Playwright + Pytest) and iOS / Android mobile (Appium) automation in OOP Python, with pages and services layers.
- Test suites in Azure DevOps pipelines with Allure reporting.
- Async flow validation with BigQuery and Pub/Sub; performance testing with k6 and Locust.

Owner of `commons_qa` · internal QA library

Designed and maintain the Python library that connects the mobile (iOS / Android), backend and web automation repositories through a shared integration layer.

- Layered architecture (toolkit → services → systems): Auth / JWT, Wallet, Oracle (SQLAlchemy), BigQuery, Pub/Sub, GCS and BrowserStack.
- Used by 10+ QA repos; versioned by tags (v3.33, 100 releases) with per-project extras.
- Automated release in GitLab CI (semantic-release) that triggers sync in consumer repos.
- 40+ toolkit scripts for test data setup and cleanup, CI CLIs and Conventional Commits git hooks.

Technologies: Python, Pytest, Playwright, Appium, BrowserStack, Locust, k6, Allure, Azure DevOps, GitLab CI, BigQuery, Pub/Sub, Oracle.

Zipnova · 2024 – 2025

QA Automation Lead

- Built an end-to-end QA process with centralized documentation.
- Drove adoption of Linear for project management.
- E2E testing across web and mobile, frontend and API.

Technologies: Playwright (TypeScript), WebdriverIO, Appium (JavaScript), AWS.

Nuevo Banco del Chaco · 2023 – 2024

QA Automation Lead

MailAmericas · 2022 – 2024

QA Automation Engineer SSR

- Automated API test collections in Postman (JavaScript).
- Test case design, execution and documentation; UAT support and estimates.
- Continuous integration, SQL queries and log analysis.

Technologies: Postman, Jenkins, Docker, GitLab CI/CD, DB2, MySQL, PostgreSQL, MariaDB, Datadog.
